IDEA GENERATION CHART

Some item that converts things to small (transitioning into the micro world scenery)	Using an actual microscope somehow	Main character trapped in small world	Mysterious object makes something big again
Possible challenge for character: some quantum law (there are some weird quantum laws)	Some weird paradox comes into play (like something from a V sauce video)	Some person (at normal scale) has some problem, and the only way to help them is with something microscopic	Euclidean geometry
Superposition	Moving backdrops to represent micro world	Optical illusions (Those weird triangles, geometrical shapes, etc…)	Robotics and electronics skills
