

Inquiry Hub Secondary School
More information: David Truss
dtruss@sd43.bc.ca 604-868-3047

Inquiry Hub Secondary School is Coquitlam's newest high school. Please contact Lead Administrator David Truss to learn more about the program.

This is a program of choice, without a specific catchment area. Family interviews are conducted to determine an appropriate fit with the program.

An application form for the 2014-2015 school year is available on the Inquiry Hub website: <http://inquiryhub.org/application/>

The Coquitlam Open Learning Inquiry Hub is for learners who share a passion for knowing and investigation and have an interest in using technology to seek answers to their questions. The Inquiry Hub will appeal to families who are seeking a smaller, cooperative learning environment where students can focus on their interests individually and in small teams – those who:

- Are motivated learners that have some self-regulation skills
- Can work independently during unstructured class time
- Want a chance to apply their learning in a practical way
- Are interested in research and learning with technology
- Find structured classes do not meet their learning needs
- Are interested in learning through social networks
- Desire to work on projects which make a difference

The Inquiry Hub offers the following benefits for students:

- Instruction which blends classroom and online experiences in a hybrid model
- A student-driven inquiry approach to learning
- Significant reduction of structured classes with emphasis on a learning commons where students do daily group project work and individual, computer-based learning
- Class environments which group students around interests and project focus rather than grade levels
- Parents and community as active learning partners
- Extensive use of peer mentorship in cross-grade projects
- Core, inquiry-based program offerings which are extended through our extensive list of online courses
