

# How to Access OneNote through Teams

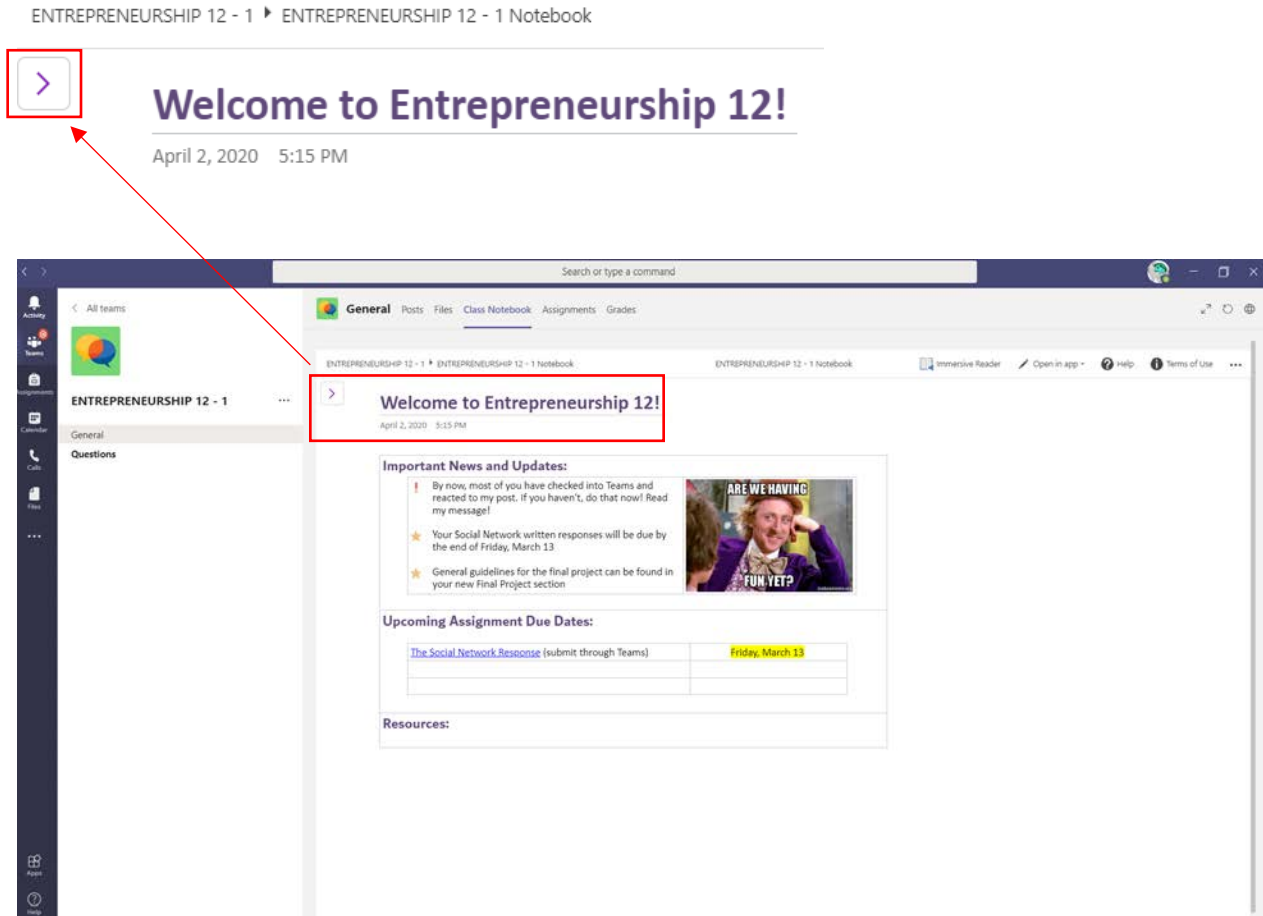

1. Start from your differing classes or **Teams** from the Teams section in the left task bar.
2. Click on the **Class** you want to access the OneNote to.

3. Once you access the class teams go to the **Class Notebook** section on the top tabs bar.

4. Here should be the first page the teacher wishes to display. To access the other pages and tabs of the OneNote from teams click on the **Extension Arrow** at the top right corner of the page.

5. Here you now have access to all the essentials to OneNote from Teams. However, if you wish to open the OneNote application or online for all the features then simply click on the **Open in app** button on the top right corner and select whichever option you prefer.
