

# Screenshotting the entire page (iPhone)

## How to screenshot the entire page on iPhone

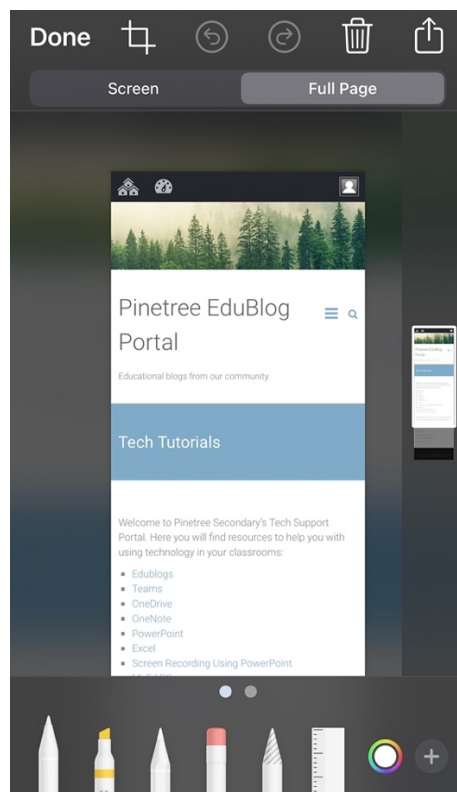

1. Select the page you want to screenshot
2. Then use the screenshotting feature
  - iPhone with a home button: Press and then release the Home button and the sleep/wake button
  - iPhone with Face ID: Press and then release the side button and volume up button

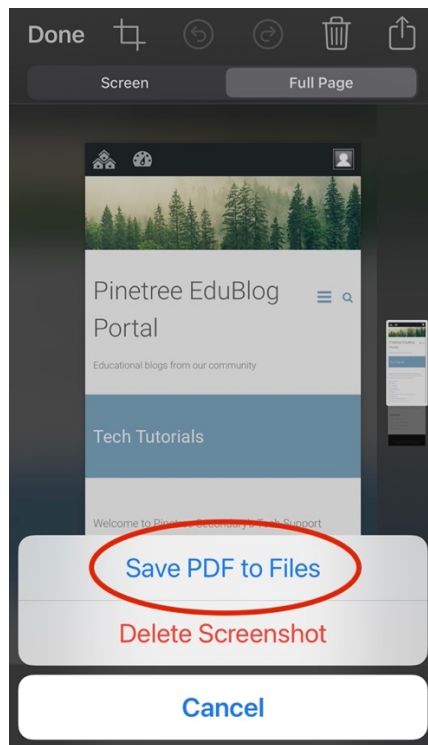

3. When this page pops up, click full page on the right.

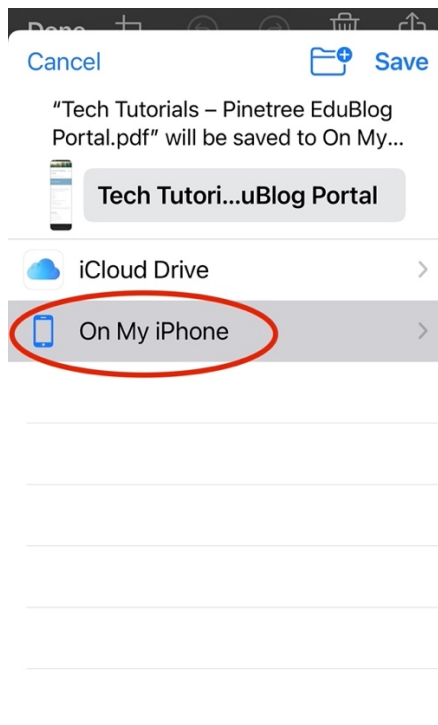

4. Then this page should pop up!

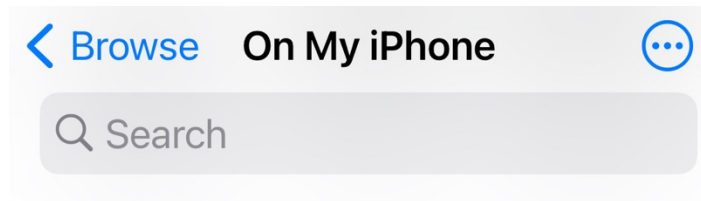

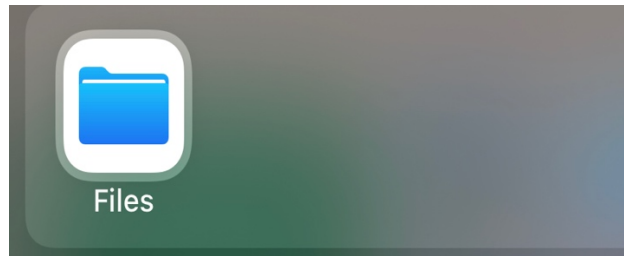

5. Then click 'Done' on left top corner and click 'Save PDF to files'

6. Choose the location of where you want to save it. Preferably I like to save it on my iPhone

7. Now go to 'Files' on your iPhone and look at the screenshot you made and the entire page should be screenshotted ! :)
