

CREPUSCULAR

Bunnies are most active at dawn and dusk. A bunny may prefer their greens and pellets at these times.

WHAT MAKES BUNNIES UNIQUE?

HINDGUT FERMENTER

Bunnies have a special GI tract that allows them to efficiently use fiber! A high fiber diet is important for their digestive health.

CAECOTROPHS

Bunnies produce a special type of poo called caecotrophs. Bunnies consume these for energy, protein and B-vitamins.

RECOMMENDED DIET

Offer a variety of leafy greens daily.

Good options include :

- romaine lettuce
- cilantro
- dill
- beet tops
- carrot tops
- basil

Sugary treats like fruit or carrots should be limited

Muesli should be avoided to prevent selective feeding.

Hay should be provided free choice.

FEEDING YOUR BUNNY
